

LUNCHTIME

- 1** Find a nice quiet place to put your puppy's food and water bowls.

- 2** Your puppy always needs a clean and fresh supply of water. Make sure his bowl is nicely topped up at all times.

- 3** Sometimes it helps to moisten your puppy's food. This makes it more palatable and can help when he is teething.

- 4** Touch your puppy while he is eating. This gets him used to interruptions and is a great way to monitor aggression.

- 5** As your puppy grows older his feeding needs change. Just be sure to ease into a new food over a 7-10 day period.
